INTRODUCTION

This annual revision of "Waterborne Transportation Lines" contains information of the vessel operators and their American flag vessels operating or available for operation on 1 October 1987 in the transportation of freight and passengers. 1/General ferries; 2/ floating equipment used in construction work, such as dredges, piledrivers, and flats; fishing vessels; and recreational craft are not included. The publication is prepared under authority contained in the River and Harbor Act approved 22 September 1922.

The names of the vessel operators are listed alphabetically in Table 1. Each line carries Engineer District number and the name and business address of the operator.

Table 2 lists the operators in alphabetical sequence and describes each vessel operated by indicating its Coast Guard number, net register tonnage, VTCC (vessel type, construction and characteristics, see explanation of terms on page IV and the inside of back cover), register and overall lengths and breadths, draft (both loaded and light), horsepower, carrying capacity in short tons or units of cargo and number of passengers, heights of fixed superstructures, cargo handling equipment, vessel operating base, and year built or rebuilt.

Table 3 lists the type of service, principal commodities carried, and waterways upon which and the location between which the services are conducted.

Information was obtained by means of a questionnaire mailed to all operators whose main operating headquarters was located within each U.S. Army Corps of Engineers District and Division's jurisdiction on 1 October 1987. The final report, following editing and collation of input data furnished by operators, was compiled and copy preparation accomplished in the Waterborne Commerce Statistics Center.

1/ The printing of separate volumes of the Transportation Lines; i.e. on the "Great Lakes System, TS-3" on the "Mississippi River System and Gulf Intracoastal Waterway, TS-4" and on the "Atlantic, Gulf, and Pacific Coasts TS-5" has been discontinued. All information has been combined into one publication.

2/ A general ferry is one which conveys passengers and vehicles (driven on and off the vessel) across a river or other narrow body of water (strait, inlet, etc.). General ferries will not be included in the "Waterborne Transportation Lines" unless they are regulated by the ICC or transport cargo and submit vessel operation reports.

EXPLANATION OF TERMS AND SYMBOLS

The term "regulated by Interstate Commerce Commission", "exempt", for hire", "private", and "unknown", as used in the "Service" column in Table 3 apply to the operators of the vessels rather than the vessels.

An asterisk (*) appearing in "Year Built or Rebuilt" column of Table 2 indicates the year in which the vessel was rebuilt. Where no asterisk appears, the reference is to the year in which the vessel was originally constructed.

The index and tables show Engineer Division/District in which the report was received by number as follows:

1. New England Division
3. New York, NY
7. Philadelphia, PA
9. Baltimore, MD
11. Norfolk, VA
12. Wilmington, NC
13. Charleston, SC
14. Savannah, GA

40. Sacramento, CA
41. Los Angeles, CA
42. Pacific Ocean Division
43. Omaha, NE
44. Walla Walla, WA
45. Tulsa, OK

The vessel type, construction and characteristics (VTCC Code) represents the alphanumeric code for the vessel type, construction and characteristics. For example, if the type of vessel was a self propelled, tanker, constructed of steel and was characterized as liquid bulk tanker the VTCC Code would be 2A22. See page IV for further explanation.
